(54) Title: **LOTION COMPOSITION FOR IMPARTING SOFT, LUBRICIOUS FEEL TO TISSUE PAPER**

(57) Abstract

A lotion composition for imparting a soft, lubricious, lotion-like feel when applied to tissue paper in amounts as low as from 5 to about 15 % by weight. The lotion composition comprises plastic or fluid emollient such as petrolatum, or a mixture of petrolatum with alkyl ethoxylate emollient, an agent such as sorbitan stearates or N-cocoyl, N-methyl glucamide to immobilize the emollient on the surface of the tissue paper web and optionally a hydrophilic surfactant to improve wettability when applied to toilet tissue. Because less lotion is required to impart the desired soft, lotion-like feel benefits, detrimental effects on the tensile strength and caliper of the lotioned paper are minimized or avoided.
